CAREER HIGHLIGHTS

- Web developer with 1-year academic experience in HTML, CSS, JavaScript, Php, Ruby on Rails, Tailwind committed to continuous improvement and quality application delivery.
- Collaborated with team of two to analyze and design requirements for web project, enhancing user interface and experience by implementing responsive design and interactive features.
- Developed website mock-up templates by conducting user research and applying design principles to meet client-specific requirements and improve visual appeal.
- Worked with developers to resolve bugs related to cross-browser compatibility by testing and debugging code, ensuring consistent user experience across different platforms.
- Met project milestones and timelines by following Agile methodologies and maintaining clear communication with instructors, ensuring requirements were not compromised.
- Conducted unit testing, diagnosed, and debugged code issues, and collaborated with team to resolve defects, ensuring high-quality code and reliable applications.

EDUCATION

Full-Stack Web Development, Diploma   *August 2023 - December 2024*
Red River College Polytechnic

- Completed web development coursework, learning advanced concepts in HTML, CSS, JavaScript, Php, Ruby on Rails and responsive web design, resulting in development of fully functional Ecommerce and CMS as final semester projects.
- Studied business requirements and practiced gathering, evaluating, and recording business demands to create technical solutions that meet organizational goals.
- Acquired practical knowledge in Agile project management by facilitating communication within cross-functional teams, such as developers and designers, to ensure project success.
- Gained experience in DevOps practices, implementing continuous integration and deployment pipelines to automate software delivery processes.

PROJECT EXPERIENCE

E-commerce Website   *July 2024*
https://github.com/phadhiil001/zaytoon_ecommerce.git

- Developed a fully functional e-commerce website using Ruby on Rails, providing a seamless shopping experience for users.
- Implemented features such as product listings, shopping cart, user authentication, order management and payment method via stripe.
- Implemented backend functionality, integrated front-end components, and ensured responsive design for optimal viewing on various devices.

Technologies Used*: Ruby on Rails, HTML, CSS, JavaScript, SQLite, Tailwind*

Content Management System (CMS)   *April 2024*
https://github.com/phadhiil001/Art_City_CMS.git

- Developed responsive CMS using Bootstrap for optimal viewing on various devices.
- Utilized JavaScript for interactive features and PHP for server-side functionality.
- Integrated relational database to manage content.

Technologies Used*: HTML, CSS, JavaScript, Bootstrap, PHP*

Website Portfolio   *December 2023*
https://github.com/phadhixil001/My-New-Portfolio-1.git

- Designed and implemented user-friendly interface to highlight key information.
- Demonstrated skills in front-end technologies by creating responsive design that functions across devices.

Technologies Used*: HTML, CSS, JavaScript, Bootstrap*

WORK EXPERIENCE

Shift Lead | Kawaii Crepe Restaurant   *October 2023 - Present*

CERTIFICATIONS

Programming Foundations: Software Testing/QA   *May 2024*
Foundations of Project Management   *February 2024*
